Daily Check

The Daily Check is used by employees to upload proof of vaccination/booster, report COVID-19 symptoms, self-report positive tests, and access other important information.

Daily Health Screening for Symptomatic Individuals

Cornell faculty and staff no longer receive a daily email reminding them to conduct a symptom assessment however, employees are required to complete the Daily Check health assessment if they are experiencing COVID-19 symptoms.

When experiencing COVID-19 symptoms, employees are expected to:

- Complete the Daily Check health assessment before arriving on campus; you will be flagged yellow and should not report to campus for the day.
- Complete an antigen test shortly after reporting symptoms: if you receive a positive result, go to the Daily Check home page and use the appropriate button on Your Self-Reported Results box to report your positive result.
- Work remotely if possible.
