

2018 Preventive medications and your plan

Managing your health with preventive medications

Your pharmacy benefit plan includes special coverage for preventive medications. These drugs help protect against or manage a medical condition, such as:

- Preventing blood clots and reducing the risk of a stroke
- Preventing heart disease and reducing high blood pressure
- Preventing osteoporosis
(a disease that leads to an increased risk of bone fracture)

Your health is important. Taking preventive medications as directed by your health care provider can help you avoid serious illness and high health care costs.

Special coverage for preventive medications

Drugs on your plan's list of preventive medications are not subject to a deductible. You'll pay your copayment/coinsurance or nothing at all, depending on your plan. So you can save money and get the medications you need to help you live a healthier life.

Preventive medications are a subset of products included within your plan's formulary, or list of prescription drugs, which tells you what medications your plan covers.

Please note that most medications on the Formulary are subject to a deductible. Preventive medications are an exception. To check the cost of any medication, refer to your benefit handbook or contact customer service at the toll-free member phone number on your benefit plan ID card.

Potential savings with generic medications

To get the most from your benefits, ask your doctor if a generic medication is right for you. Generics normally cost less than brand medications, and the Food and Drug Administration (FDA) requires them to be just as safe and effective.

Quality drives our decisions

Our committee of independent doctors and pharmacists meets regularly to review medications and consider how they should be covered by your pharmacy benefit plan. They also recommend which medications should be on your plan's list of preventive medications.

A list of covered preventive medications begins on the next page. Medications are listed by therapeutic category. To help you tell generic and brand drugs apart, all generics start with a lowercase letter. For questions on injectable dose forms of preventive medications administered by your healthcare provider, please call the number on the back of your membership card for more information.
