Workday 29 will be live on Monday, September 11th.
As a reminder, campus users will be locked-out of Workday at 5 p.m. on Friday, September 8th through the duration of the weekend or until we have completed our transition to Workday 29. Please plan your work accordingly.

What’s New – Changes to the Worker Profile
The profile has a new visual redesign, offering increased compatibility with accessibility software. Specific changes:

- **Page Orientation (A):** The navigation menus are now listed on the left side vs. horizontally.
- **Multiple Positions (B):** If an employee has more than one position, you will now use the double-arrow icon to switch the view for each position.
- **New Summary View (C):** There is also a new “Summary” view which highlights an employee’s:
  - Manager and Supervisory Organization
  - High-level Job Details
  - Appointment Information (for Academics only)

The information displayed in each of these three ‘cards’ will be based on the user’s security access.

- **Other Menu Options (D):** The other menus options (Job, Career, etc.) will function exactly as they did before Workday 29, displaying the same sub-menus and information.

What’s New – New Error Message Format
Error messages will display under specific fields and in a summary error box, which will help users easily identify what values need updating.
